PROFESSIONAL SUMMARY

Software developer with skills in Python, Data Structures & Algorithms, and React. Solved 150+ LeetCode problems and built multiple projects to improve my development skills. Keen to learn and explore more in AI and software development.

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Rishihood University	Grade: Pursuing

Intermediate (Class XII)	2022 - 2024
Canara Vikaas PU College	Grade: 86.1%

Matriculation (Class X)	2018 - 2022
Bhuvana Jyothi Residential School	Grade: 89.2%

INTERNSHIPS

Software Engineer Intern	April 2025 - July 2025
AgroEdge	Remote

During my three-month internship at AgroEdge, I worked on both the main website and the operations platform using TypeScript, Tailwind CSS, Supabase, Calendly, and Figma. I implemented multi-language support for 20+ Indian and international languages and worked on frontend UI improvements. I also independently built the mentorship module for Admin, Mentor, and Farmer roles, integrating Calendly for session scheduling and Supabase for authentication, data management, and role-based access. I designed the module's UI/UX in Figma and worked closely with my manager and team to build and improve the features.

PROJECTS

Portfolio (Github) (Demo)	September 2026
Built and deployed my personal portfolio website with a custom domain and DNS setup. Improved its SEO and connected Google Search Console and Bing Webmaster Tools to monitor search performance.	

Purchase Assistant (Github)	August 2026
Developing an AI-powered purchase assistant to automate order processing. The agent captures and processes order details and updates the database after human verification, with the goal of reducing employees' manual workload.	

Shweta Drug Distributors (Github) (Demo)	June 2026
Developing a full-stack website for Shweta Drug Distributors to establish their online presence and automate business workflows, with the goal of reducing employees' manual workload by approximately 30%.	

Onyu (Github) (Demo)	December 2025
Built a frontend website for Onyu, a startup developing a smart ring, to showcase the product, its features, and brand.	

CERTIFICATIONS

Internship Completion Certificate Agroedge (Link)	July 2025
Completed a three-month Software Engineer Internship at AgroEdge, gaining hands-on experience in a professional development environment.	

100 Days Leetcode Leetcode (Link)	January 2025
Solved 150+ LeetCode problems and earned the 100 Days Badge for consistent coding and problem-solving.	

SKILLS

Languages: Python, JavaScript, TypeScript, HTML, CSS

Frameworks & Technologies: Express JS, React, Node.js, Tailwind CSS, Supabase, Next.js

Databases & Tools: Git and Github, MongoDB, MySQL, Figma, Pandas
